EXPERIENCE

Pernod Ricard USA | New York, NY

Supply Chain Performance Analyst – Inventory Optimization and Data Automation | January 2023 – May 2026

- Identified business challenges and opportunities through rigorous analytics, developing strategic and tactical recommendations that drove \$35K monthly savings—demonstrating quantitative decision-making on major company challenges.
- Performed statistical modeling and hypothesis testing across 500K+ transactions and 120 product portfolios, connecting performance drivers to historical behavior to surface actionable insights for senior leadership.
- Supported product strategy and pricing optimization initiatives by building Power BI analytics infrastructure to monitor portfolio health and segment high-risk segments, enabling data-driven go-to-market strategies.
- Developed execution roadmaps encompassing problem frameworks, hypotheses, testing and analysis, solution development, operational feasibility scoping, and monitoring plans—translating complex data into strategic business outcomes.
- Drove cross-functional partnerships with IT, Sales, Operations, and Finance to improve volume, profitability, and service quality—demonstrating tenacious decision-making and strategic influencing in a fast-paced, entrepreneurial environment.
- Engineered scalable analytics pipelines by transforming 900K+ rows of data across 15+ sources, enabling feasibility analysis and implementation oversight for high-impact product and pricing programs.

Tata Consultancy Services | Midland, MI

Data Analyst – Global Insights Team | March 2021 - December 2022

- Created risk models and analytics frameworks connecting credit performance drivers to historical consumer behavior, delivering strategic recommendations that achieved 19% efficiency improvements and 6% performance gains.
- Built enterprise analytics infrastructure for \$30M+ in pricing and operational metrics, enabling cross-functional teams to make rigorous, data-driven product decisions and exceed business targets through analytics.
- Supported market research initiatives and direct-to-consumer insights for \$400K+ in portfolio analysis, translating quantitative findings into strategic product and go-to-market recommendations that informed customer experience design.
- Engineered analytics reporting for 12,000+ monthly transactions using statistical modeling and anomaly detection to improve forecast accuracy by 8%, demonstrating rigorous monitoring and analysis across portfolios.

Biogen Inc. | New Brunswick, NJ

Project Intern – Sustainability and Risk | September 2020 - December 2020

- Co-led development of risk assessment framework connecting exposure drivers to historical performance, identifying \$100K+ in savings opportunities and supporting strategic decision-making through quantitative analysis.

Rutgers Supply Chain Analytics Laboratory | Piscataway, NJ

Research Assistant – Global Markets | May 2020 - August 2020

- Performed rigorous market research using Tableau on 20+ years of historical data across 3,000+ products, identifying trends, risks, and opportunities to support strategic and tactical recommendations for market entry.

- Conducted quantitative analysis to define analytics requirements, performed data transformation and ETL, and synthesized findings into actionable strategic recommendations informed by rigorous monitoring of market drivers.

Matrimony.com Limited | Chennai, India

Decision Support Analyst – Customer Retention | December 2018 - March 2019

- Built and deployed Python-based risk and propensity models that achieved 90% targeting accuracy, demonstrating impact on strategic decision-making for customer acquisition and lifetime value optimization.
